ARCHIBUS is used at Hamilton County to manage more than just maintenance and space. We have taken ARCHIBUS to the next level and integrated various services and data that is provided by the Facilities Department.

## Integrated System of Modular Information

After using ARCHIBUS for several years, the Facilities Department has extended the system to other departments and agencies around the County. Here you can see our current listing of users by module. We are excited about all of the continued interest and growth in users. ARCHIBUS Shared Services is just one of many services that the Facilities Department offers other departments and agencies, who are our customers.
