ACS DEMOGRAPHIC AND HOUSING ESTIMATES

2008-2012 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Ohio				Hamilton County, Ohio
	Estimate	Margin of Error	Percent	Percent Margin of Error	Estimate
<b>SEX AND AGE</b>					
Total population	11,533,561	*****	11,533,561	(X)	801,350
Male	5,630,373	+/-1,224	48.8%	+/-0.1	384,730
Female	5,903,188	+/-1,224	51.2%	+/-0.1	416,620
<b>Under 5 years</b>					
Under 5 years	712,820	+/-470	6.2%	+/-0.1	53,015
5 to 9 years	750,218	+/-4,578	6.5%	+/-0.1	51,682
10 to 14 years	770,410	+/-4,509	6.7%	+/-0.1	51,380
15 to 19 years	817,811	+/-1,112	7.1%	+/-0.1	57,273
20 to 24 years	766,409	+/-960	6.6%	+/-0.1	59,012
25 to 34 years	1,420,955	+/-1,624	12.3%	+/-0.1	108,905
35 to 44 years	1,482,197	+/-1,081	12.9%	+/-0.1	98,036
45 to 54 years	1,724,093	+/-977	14.9%	+/-0.1	118,560
55 to 59 years	784,545	+/-3,881	6.8%	+/-0.1	53,252
60 to 64 years	669,501	+/-3,971	5.8%	+/-0.1	42,900
65 to 74 years	860,348	+/-663	7.5%	+/-0.1	53,838
75 to 84 years	543,287	+/-2,513	4.7%	+/-0.1	36,396
85 years and over	230,967	+/-2,512	2.0%	+/-0.1	17,101
<b>Median age (years)</b>					
Median age (years)	38.8	+/-0.1	(X)	(X)	37.1
<b>18 years and over</b>

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological differences in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see [http://www.census.gov/acs/www/methodology/questionnaire\\_changes/](http://www.census.gov/acs/www/methodology/questionnaire_changes/). For more information about changes in the estimates see <http://www.census.gov/population/hispanic/files/acs08researchnote.pdf>.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
